

## MY ROOM TOUR

My job is to build a model with paper and then I photograph it.

The photo represents a strange atmosphere that looks real, but in reality it is not. If you get close, you can understand.

I just moved a week ago from Florence to Modena.

My room is empty.

It has no traces such as dirt and stains and the entire surface is uniform.

This atmosphere pushes me to build this chamber made of paper.

Because this simple room made of paper represents my current situation.

That is, there is no presence of my memory in this room yet.

This time, in my first attempt, I will put the model and the photo side by side.

Visitors can take pictures of my model, so everyone has their own photo of my model.

They will have fun looking at the difference in their photo and mine.

As a first step in my life in Modena I build my bedroom.

I continue my artistic activity here too.

How do you play with this model?

Feel free to photograph this model.

Put this photo you took now on your instagram by inserting the hashtag

#myroomtouratopenhouse

In this way, the photographs taken from the point of view of various people through my model are collected in one place on instagram and we can compare them.
